Technical Skills

Programming: Java, Python, C/C++, C#, JavaScript, Rust, Zig, Bash, HTML, CSS.

Tools: Linux (Ubuntu, Arch, Mint, etc.), Windows 10/11, Git/GitHub, IDEs and editors (VS Code, Vim/Neovim, Nano, Arduino IDE), 3D modeling (Fusion 360, Onshape), 3D printing (FDM).

Skills: PCB design, soldering, basic networking, web development, embedded systems (microcontroller programming), game development.

Projects & Initiatives

Secure LAN File Transfer App (Python): Independently developed a network file-transfer tool with an easy-to-use GUI. Features include automatic LAN device discovery (via UDP broadcast), chunked TCP file transfers with resume support, and full TLS encryption. Implemented SHA-256 checksums to verify file integrity.

Custom Macropad Firmware (C): Designed and programmed firmware for a custom mechanical keypad. Uses a programmable microcontroller and configurable key mappings. Gained experience in low-level hardware programming and embedded software development.

STEM Education Outreach: Created an initiative to design and create affordable STEM kits for local schools and families, focused on bringing hands-on STEM learning to under-resourced communities.

Leadership & Activities

FIRST Robotics Competition (Team 10416): Led robot software development for the 2026 season, mentored programmers, and served as the robot driver during competition. Contributed significantly to robot CAD design during the 2025 and 2026 seasons. Supported fundraising efforts and initiated the team's participation in the Spokane Chamber of Commerce Nonprofit & Event Showcase to strengthen community outreach. Helped the team earn the Rookie All-Star Award in our rookie season in 2025, as well as the Rising All-Star Award in 2026.

CyberPatriot 18

Team placed 2nd in Washington State in the platinum division in 2025. CyberPatriot challenges students to "find and fix cybersecurity vulnerabilities in virtual operating systems," which sharpened my security and Linux skills.

SkillsUSA: Developed strong teamwork, communication, and problem-solving skills through industry-driven projects and placed 2nd in Cybersecurity (Team of 2) and 1st in Computer Programming (Individual) in the Eastern Division.

FBLA: Member of Future Business Leaders of America, developing leadership, technology, and communication skills through business-focused events. At the regional round, I placed 1st in Introduction to Information Technology, 2nd in Introduction to Programming, 3rd in Technology Support & Services, and 4th in Cybersecurity. At the state round, I placed 6th in Technology Support & Services and 1st in the state in Introduction to Information Technology.

Student Government: Current Vice President at Spokane Valley Tech and former ASB President in middle school. I have developed strong communication, organizational, and leadership skills through student government and ongoing school leadership responsibilities.

Honor Societies: National Honor Society (current) and National Junior Honor Society (former), recognizing academic achievement and character.

Education

Sophomore at Spokane Valley Tech High School, Spokane Valley, WA (Expected Graduation: June 2028)

GPA: 3.96/4.00

Relevant Classes:

AP Computer Science Principles
AP

Cybersecurity

Electronics Technology

AP Physics

Algebra II

Honors & Awards

CyberPatriot 2025: 2nd place in Washington State Platinum Division.

SkillsUSA 2026: 1st place in Computer Programming and 2nd place in Cybersecurity in the Eastern division.

PACE Awards (Multiple):

Recognized by the PACE community program for demonstrating exceptional character and leadership traits and qualities.

Community Service

Second Harvest Food Bank (Spokane): Helped sort and distribute food donations on multiple occasions.

Supported a holiday gift distribution event, helping provide Christmas presents to local families in need.

Downtown Spokane Outreach: Supported local small businesses by providing hands-on assistance on multiple occasions.
